[Github](#)

[Portfolio](#)

Back End Developer with knowledge in agile methodologies, GIT, data structure, algorithms, frameworks, ORMs, databases, containers. I have been developing software with Typescript, C#.NET, Angular, among others. I also have good communication and teamwork skills. English level: B2 - Upper Intermediate.

PROJECTS

Front End - Lalo Servicios

[5/2023](#)

Freelance.

Web application which has information about the company and his different services and products. Each product has a detail page with description, images and videos. Also, there are different ways to contact the owners to get more information.

Front: Angular, Angular Material, Tailwind.

Full Stack - Kr Bijouterie

[4/2023](#)

Freelance.

Web application where the owner can show all his products to customers. Also, it has contact information about the venture, and different ways to do it. Finally, it has an administration section that can be accessed with authentication, this section has tables of the products and categories on the website, where products and categories can be hidden to customers, can be modified, and the owner can add more through forms.

Front: Angular, Angular Material, Tailwind.

Back: JWT, ASP .NET, SignalR.

Base de datos: PostgreSQL y Entity Framework.

[Site](#)

Full Stack - Real Time Chat

[3/2023](#)

Personal project.

Chat application, once an account is created, the user can search for other existing users by name and identifier, and exchange messages with them. The relevance of the project is the use of SignalR to create real-time functionalities such as receiving messages and requests.

Front: Angular, Angular Material, SignalR.
Back: JWT, ASP .NET, SignalR.
Base de datos: PostgreSQL, Entity Framework.
